

EXPERIENCE.

Rush Resources enables superior project success while delivering great experiences every time.

Businesses with large and complex project can simplify, prioritize and execute project by growing productivity and efficiency while lowering capital risk.

You can improve and optimize capital construction, shutdown, turnaround and maintenance project experiences—no matter their stage of completion or location—through proven, rapid, economical, predictable and high-performance industrial services.

A FULL RANGE OF SERVICES THAT PREDICTABLY OUTPERFORM.

PRODUCER

STRATEGIC Perspectives

Field-proven leadership that ensures the best overall project experience, risk mitigation and successful outcomes.

PERFORMER

TACTICAL Completion

Craft and trade excellence that delivers activity, budget, schedule and safety success through improved cultures.

PEOPLE

RESOURCE Flexibility

Scalable and available resource pool, from strategic leadership to quality craftspeople, that get the job done.

RUSH RESOURCES
ACHIEVE MORE.

WHY RUSH
RESOURCES?

PERFORMANCE.

Rush Resources solves the largest problems found in complex construction projects.

Rush brings project transformation to industries stuck in project “status quo” outcomes. Rush restores capital performance and project success by delivering the best project experiences and business relationships.

You can count on Rush Resources to outperform in every aspect of a project so that you can outperform expectations.

THE PROBLEMS WE SOLVE

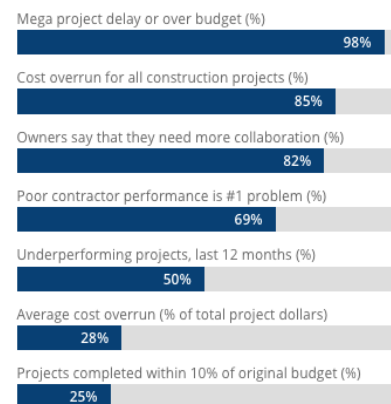

Restoring capital performance while lowering project risk.

Statistics reveal that 78% of owners and construction companies believe that project risks are increasing. And that the average construction dispute costs approximately \$33 million, while causing an average 17 month delay.

Additionally, it is estimated that 30% of construction work is due to rework, representing approximately 9% of the total project cost.

Rush Resources brings project transformation through the right leadership, management, culture, skilled resources, transparency, higher performance, greater craft productivity and reducing rework.

Industry Statistics:

KPMG, Dodge Analytics, McKinsey (2019-2021)

WHY RUSH RESOURCES?

OUR ADVANTAGE	YOUR BENEFIT
Broad Project Experience	The right expert at the right place at the right time, every time. Skill and resource to get the job done right the first time.
High-Performance Culture	Your project experiences the right attitude, performance and outcomes you need to keep your project on-time, on budget and safe.
End-to-End Capability	Simplicity and comprehensiveness. You have a single source for the leadership, experience, skill, resource, method, process and integration your project requires.
Project Acceleration & Velocity	Reduced project friction, a smoother project and keeping things on track
Dedication to Excellence	Operational excellence from start to finish with no exceptions means that things are done right, safely and with a substantial reduction in rework.
Rigorous Advocacy & Neutrality	Your interests are protected every step of the way through strict accountability and contractor neutrality.
Comprehensive Safety	Safe people, work sites, assets, project phases, activities and tasks through a comprehensive and holistic view to safety.
Consistent, Predictable Results	Reducing project uncertainties with a no surprises project environment that delivers smoother and predictable project commissioning and completions.
Trusted Relationships	Open, honest, professional and collaborative relationships based on shared objectives, culture, responsiveness and clear communication.

WHY RUSH RESOURCES? BETTER PROJECTS.

RUSH RESOURCES P3 SERVICES AND SOLUTIONS.

PRODUCER

Owner Representation	Peace of mind for project owners and confidence that your interests are protected across the entire project—every step of the way, from concept to construction to close out.
Planning and Scheduling	Predictably hit project milestones and goals by applying experience in dealing with complex logistical challenges and the time-consuming aspects of planning and scheduling necessary for project success.
Project Coordination	We take responsibility for the whole, or a portion, of an EPC project to ensure safety, productivity, performance, budget and schedule accuracy and rework minimization.
EPC Interface Management	Effectively reduce EPC risk through improved alignment, communication, resource utilization, task completion, accountability and performance measurement.
QA/QC Inspection	Ensure quality control and safety, reducing the cost of personnel, equipment and rework associated with large and complex projects. Validate self-performing contractors to get what you're paying for.

PERFORMER

Commissioning & Completions	Keeping budgets and schedules in line through inspection, verification, calibration and testing of complex instrumentation, electrical and mechanical process controls and safety systems.
Instrumentation & Electrical	Comprehensive I&E assembly, installation, testing and commissioning, documentation, troubleshooting, preventative maintenance and turnaround support.
Rotating Equipment	Reduce unplanned outages and cost associated with rotating equipment failure through proper installation, inspection, maintenance and repair for motors, generators, drives, gear boxes, pumps, valves and more.
SIS & Automation	Achieve a safer and more reliable process operation. Modern approaches to integrating safety and increasing safety integrity with best-in-class oversight and emergency shutdown capabilities.
Control System Engineering	Enable your facility to operate better, more safely and at a lower cost. Bring together the best in process, equipment, control systems and sensors that monitor production and environments for the best performance.

PEOPLE

Specialized Craftsmen	On-demand, experienced craftsmen with a high-performance attitude and work ethic. We have proven recruitment and retention programs that ensure your safety, productivity, quality and budget control.
Commissioning and Startup	Expertise across all aspects of Commissioning and Startup that allow you to anticipate and prepare for almost anything found in typical build to commission scenarios leading to quick operational transitions.
Technical SMEs	Technical experts that uncover challenges or problems before they cost you money and time you don't have. Extensive domain, equipment, process, project, plan, engineering, integration and systems knowledge.
Construction & Project Mgmt.	Reduce or eliminate construction failure with experts with decades of hands-on leadership of complex construction projects. Keep things on track, on-budget and achieving the level of success you want.
Control System Engineers	People that work alongside your organization to achieve your control system objectives for devices and valves, motor driven elements, fluid actuators, solenoids and relays and SIS infrastructures.

ASSESS, PRIORITIZE, ALLOCATE AND ACCOMPLISH WHAT IS NEEDED TO ENSURE EPC PROJECT SUCCESS.

Every EPC project starts with a great strategy, high expectations and the application of scarce capital toward anticipation of superior returns on investment. Owners rely on EPC firms to take full responsibility for the planning, construction, testing and commissioning of a new industrial plant, chemical processing facility or refinery. Unfortunately, all too often the project experiences problems right from the start—putting capital, people, assets, projects, schedules and budgets at risk.

Rush Resources protects capital, people, assets, projects, schedules and budgets.

We bridge the gap between expectations and the realities of large, complex and expensive EPC projects. We understand how to get projects back on track and increase success for the entire project or at

the individual task and activity that protects your money, people, assets, schedules and budgets. To do this, Rush Resources brings to every existing project:

- Strict Owner Representation: Rush Resources acts on behalf of and keeps the owner interests at the forefront of all project related strategies, details, schedules, budgets and outcomes.
- “Cold Eyes” Perspectives: As a neutral third-party, we don’t bring in any “hidden agendas” or try to manipulate information, communication, schedules, reporting to deliver objectivity, clarity, shared priority and collaborative success.
- Expertise and Skill: Your project is not “our first rodeo.” In fact, our experts have gained their skills, perspectives and knowledge over hundreds of projects, across decades of “hands-on” participation in complex EPC projects. We know where the problems are and how to fix them.
- Clarity, Focus and Prioritization: Our people, processes, tools and relationships quickly and accurately diagnose where project problems or bottlenecks are and how to fix them to bring projects back on track toward successful completion.
- Accountability: Relying on an EPC partner to “self perform” invites shortcuts, miscommunication, misinformation, increased rework and change order rates and, generally, poor contractor performance. Rush Resources restores truth and accountability to every project with strict, documented and verifiable project outcomes that directly contribute to project success.
- Transparency: Project cultures become open, collaborative and high-trust environments with clear communication, shared priority and swift problem identification and resolution.
- Scalability and Nimbleness: Rush Resources has the skill, experience, leadership, processes, tools and skilled craft to restore project integrity in the largest to the smallest projects—we scale to your required scale.
- Cost Effectiveness: Our customers always find that when they engage Rush Resources their rework rates fall, communication is improved, and schedules and budget confidence are restored. All bringing greater return on investment and cost effectiveness to the project.

What can we help you rescue? (check the appropriate boxes)

A SYSTEMATIC APPROACH TO DELIVER PREDICTABLE AND REPEATABLE SUCCESS.

Commissioning, Completion and Startup activities have the right process and team on every project. Have predictable, safe, incident-free and successful Startups with proactive integration and application of processes, technology, subject matter experts, best practices and eight services that form a “tool kit” that delivers “no surprises” results, from FEED through Startup.

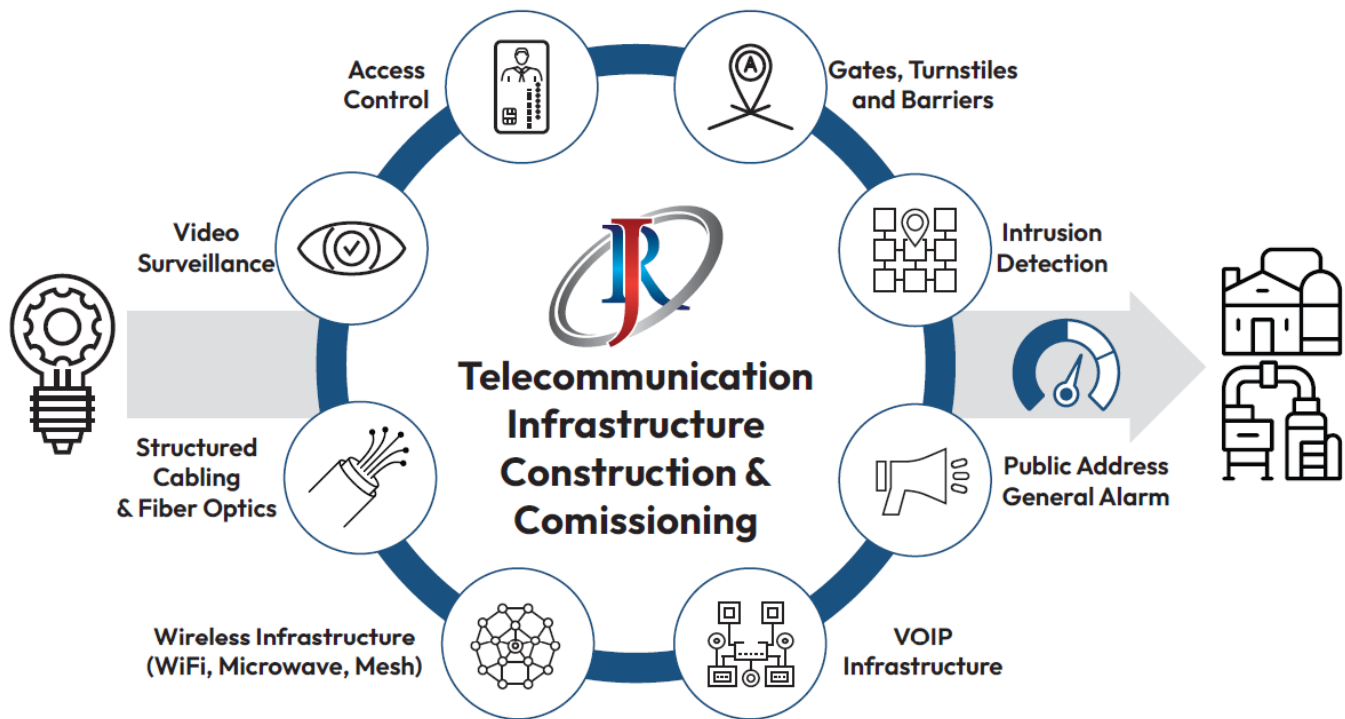

- Planning: Ensuring Successful startup strategies before starting the project and preventing unnecessary expenditures.
- Constructability: Identify construction and performance challenges ahead of onsite execution to smooth design and construction, keep things on schedule, and lower the overall cost of construction and maintenance.
- EPC Interface: Clear, comprehensive, and actionable communication across all stakeholders to identify and resolve risks and issues before they lead to costly rework and delays.
- Quality Verification: Being your “eyes and ears” on everything within a project to keep activities on-track, on-time, and on-budget.
- Field Checkout: Since we’re all field technicians by experience, we personally perform the tests you need to ensure everything works as it should. (Note: additional information on our capabilities on following page regarding field check out, loop checks, and fire & gas).
- Function Testing: Applying experienced resources and processes to ensure the safety integrity levels of integrated systems function as designed.
- PSSR: We actively participate in pre-startup safety reviews to ensure the correct certifications are in place and deliver the documentation you need for successful ongoing operations and lower maintenance.
- Startup Support: working as an integrated team to ensure smooth handovers, safe startups, and a predictable operational state.

Rush Resources Commissioning and Completion services and experts delivers:

A COMPREHENSIVE TELECOM SERVICES BENEFIT

PEOPLE, SKILL, EXPERIENCE, AND SERVICES THAT MEET RIGOROUS TELECOMM NEEDS

Keeping an eye on every aspect of operational communication infrastructures. Recognizing and delivering access, security, communication, and safety performance.
